How we use cookies

Cookies are small text files stored on your computer by your browser. They're used for many things, such as remembering whether you've visited the site before, so that you remain logged in – or to help us work out how many new website visitors we get each month. They contain information about the use of your computer but don't include personal information about you (they don't store your name, for instance).

We use traffic log cookies to identify which pages are being used. This helps us analyse data about webpage traffic and improve our website in order to tailor it to customer needs. We only use this information for statistical analysis purposes and then the data is removed from the system.

Overall, cookies help us provide you with a better website by enabling us to monitor which pages you find useful and which you do not. A cookie in no way gives us access to your computer or any information about you, other than the data you choose to share with us.

You can choose to accept or decline cookies. Most web browsers automatically accept cookies, but you can usually modify your browser setting to decline cookies if you prefer. This may prevent you from taking full advantage of the website.
